Note: Data were combined for hospitals with the same provider number and different division codes.

\* Data was collected during a shorter time period (fewer quarters) than the maximum possible time for this measure (one quarter equals three months).

\*\* The number of cases is too small to be sure how well a hospital is performing. In addition, data was collected during a shorter time period (fewer quarters) than the maximum possible time for this measure (One quarter equals three months).

\*\*\* No data is available from the hospital for this measure.

\*\*\*\* The number of cases is too small to be sure how well a hospital is performing.

Time to ECG = Average number of minutes before outpatients with chest pain or possible heart attack got an ECG (lower numbers are better).

Time to Fibrinolysis = Average number of minutes before outpatients with chest pain or possible heart attack who got drugs to break up blood clots (lower numbers are better)

Aspirin at Arrival = Outpatients with chest pain or possible heart attack who got aspirin within 24 hours of arrival (higher numbers are better).

Fibrinolysis Within 30 Minutes = Outpatients with chest pain or possible heart attack who got drugs to break up blood clots within 30 minutes of arrival (higher numbers are better).

Preventive Antibiotics Started = Outpatients having surgery who got an antibiotic at the right time - within one hour before surgery (higher numbers are better).

Preventive Antibiotic Received = Outpatients having surgery who got the right kind of antibiotic (higher numbers are better).
